PROJECT DESCRIPTION

Cluster Group Affiliation—TCE HIV

Congressional Districts Served— Washington, D.C.

Purpose, Goals and Objectives—The goal of this TCE HIV project is to enrich the current service continuum by focusing resources on providing recovery focused treatment planning, supportive family services, and community linkages for members of the target population.

Target Population/Geographic Service Area—The target population of this project is African American and Latina women and their children in the District of Columbia and adjacent areas of Maryland and Virginia.

Service Providers—Project client services will be provided by the Whitman Walker Clinic, in coordination with community-based providers in the target areas.

Services Provided—The project will provide intensive outpatient treatment, an independent living facility, and partial hospitalization services.

Desired Project Outputs—The project will serve 218 women over the three-year period.

EVALUATION

Strategy and Design—The evaluators will use a repeated measures design and will gather data on each client. Data collection will take place at intake, and at six months and one year after intake.

Evaluation Goals/Desired Results—The chief goal of evaluation is to detect and document any changes in drug use, criminal justice involvement, or overall health status that are associated with the project's interventions, as reflected by variable changes over time. Evaluators will collect and report GPRA data as required by CSAT.

Instruments and Data Management—The GPRA, Holistic Client Assessment, and Quality of Life Inventory instruments will be used to gather client data.
